SCOTLAND'S MOST BEAUTIFUL HIGH STREET

AYR

Ayr High Street is going through a major transformation. We have implemented environmentally friendly waste collections and have placed general waste, paper/cardboard/glass, food bins throughout the town centre.

The horticultural offer in Ayr High Street is obvious; we have many colourful hanging baskets and mature trees within the High Street. Good lighting of prominent historical buildings shows off the quality of the buildings we have here. We also host some events in the High Street and have experience with professional lighting and stage spaces there.

We have a high level of community involvement in the high street, local groups do litter picking and general tidying of “their” town. This, in conjunction with what the Council do in regard to litter/waste is seeing a great improvement in the cleanliness of the High Street.

A community Interest group is finalising its submission to open a large community space at the bottom end of the high Street; Once completed this will see community cafes, art spaces, meeting spaces and recreation areas.

We have also seen the recent completion of the “Grain Exchange” in the High Street (a Georgian building brought back to life by the Council) it now holds daily events including art expos, craft selling and the possibility of bespoke market spaces.

We also have major plans which have been confirmed for projects within the High Street. Including a swimming pool and a major gym complex; a green space at the bottom of the High Street, this will incorporate residential space, pop up shops and would possibly include walkways running beside the river Ayr (not been seen from this site in at least 3 generations).

Through SAC's Ayr Town Centre Action Plan refurbishment of LA owned properties will compliment this activity adding a vibrant spirit to the town.
